## GENETICALLY MODIFIED FOOD PROFICIENCY TESTS

Nearly 40 years after the first product trials, GM foods and crops remain a topic of much discussion, with some territories embracing the technology widely, some restricting the use and cultivation of GM crops and others continuing to ban their use in agriculture.

Currently there are 32 approved GM crop plants, from alfalfa to wheat, and more than 49 countries with GM crop approvals relating to traits such as modified yield, disease and pest resistance, herbicide tolerance and more. ([www.ISAAA.org](http://www.ISAAA.org) GM Approval Database 2024)

Note: The information in this price list is designed to assist you in choosing proficiency tests to meet your needs. Whilst every care has been taken in producing this information, we do not guarantee its accuracy. The Fapas® website is the definitive source of information about our proficiency tests. Orders are subject to the Fapas® terms and conditions, which are available on our website. Please check the website before placing your order.
